

Texas Outpatient & Infusion Center

In association with **CCMC** Health System

Transforming Diabetic Care

Brad's Testimonial

"I was really having trouble with my feet, and the neuropathy was really giving me a tough time," ... prior to treatment, he really had no feeling in his legs half-way up his calf. But almost immediately after starting treatments, he started noticing a difference.

Dovie's Testimonial

"When I first started, I couldn't walk. It took everything I had to walk in here," she said. Dovie was struggling with diabetes, neuropathy, and near kidney failure. But these serious medical conditions have waned after a year of weekly treatments, and she's reaped the benefits.
